

REMARKS

Pursuant to 37 C.F.R. §1.116, reconsideration of the instant application, as amended herewith, is respectfully requested. Entry of the amendment is requested.

Claims 1-10, 33-42 are presently pending before the Office after cancellation of the withdrawn claims. Applicant has amended the specification and claims to clarify definitions as requested by the Examiner. No new matter has been added. Support for the amendments can be found throughout the specification as originally filed. Applicant is not intending in any manner to narrow the scope of the originally filed claims.

The Examiner's Action mailed January 10, 2005 has been carefully studied by Applicant and the undersigned counsel. The amendments appearing herein and these explanatory remarks are believed to be fully responsive to the Action. Accordingly, this important patent application is believed to be in condition for allowance.

Applicant thanks the Examiner for the last telephone interview wherein the Examiner stated that with the amendments presented herein, he would allow the claims of the patent application. Accordingly, Applicant response herein is limited to the amendments, which render the rejections in the Final Office Action moot.

The math symbols discussed with Examiner were clarified in the corrected amendment and amendment filed May 26, 2004 and therefore are not corrected again herein. As agreed to with the Examiner, the symbols are meant to be exponential power symbols.

CONCLUSION

Even though the initial claims in this important patent application were drawn to a new, useful and nonobvious invention, they have now been amended to increase their specificity of language.

A Notice of Allowance is earnestly solicited.

If the Office is not fully persuaded as to the merits of Applicant's position, or if an Examiner's Amendment would place the pending claims in condition for allowance, a telephone call to the undersigned at (727) 538-3800 would be appreciated.

Very respectfully,

Dated: 2/24/05
